

Metals
for solo dan tranh
and tape

The dan tranh is to be amplified. The tape-part consists of four discrete channels, to be sent to four corners of the concert hall. The speakers should be placed relatively far from the audience in order to obtain a quadrophonic experience for the audience. Practising with tape is necessary to solve timing issues.

$\text{o} = 26$ (which is the tempo of the tape)

A 1" No arpeggio unless written
